magnety@selos.sk

White lacquered body, **ferrite** magnetic core, anisotropic, working temperature max. +200°C.

The holding force is determined at room temperature (20°C) on a polished plate made of mild steel with a thickness of 10 mm by pulling the magnet vertically from the surface (1 kg ≈ 10 N). A deviation of -10% in the stated values is possible in exceptional cases. In general, the value will be exceeded. Small cracks in the magnet do not influence the holding force.

SKU	Holding force	Diameter	Thread	Availability(days)	Weight(kg)	Price incl. VAT
140.020	18.0 N	16 mm	M3	4	0.007	3,49€
