### BM 1350, BM 2500, BM 5000

These models are designed for lifting heavy metal sheets and blocks. The maximum lifting capacity is achieved with a material of 50 mm or more with a high quality surface. The BM 5000 has a large load capacity, thanks to two built-in coils.

### BM 3600

This model is specifically designed to lift sheets of 3 mm or more. With a smooth and level surface, the magnet raises a 2400x1800 mm sheet of 3mm thickness and a 6000x3000mm sheet of 25mm. The TIP-OFF feature allows you to browse a safe number of individual sheets from the bundle.

#### Basic technical data:

TYPE	BM 1350	BM 2500	BM 5000	BM 3600
Description	3-pole flat magnet	3-pole flat magnet	3-pole flat magnet	3-pole flat magnet
Length (mm)	272	400	1 200	1 050
Width (mm)	242	242	300	240
Height in crane hook (mm)	460	460	460	460
Weight (kg)	60	72	203	180
Lifting capacity (kg)	2 700	5 000	10 000	7 200
Secure lifting capacity for flat material (kg)	1 350	2 500	5 000	3 600
Voltage / capacity of the battery (V / Ah)	12 / 35	12 / 50	12 / 70	12 / 70
Battery type (DIN)	43539-2	43539-3	43539-3	43539-3
Discharge time at 50% duty cycle (h.)	8	8	8	8
